

Varsity View Water Main Replacement Project

During the 2023 construction season (May – October) the City of Saskatoon will be working in your neighbourhood:

- Replacement/installation of 1,367m of water main
- 174m of water main maintenance
- Replacement of 70 lead water and sewer service connections
- Road, sidewalk, and curb rehabilitation

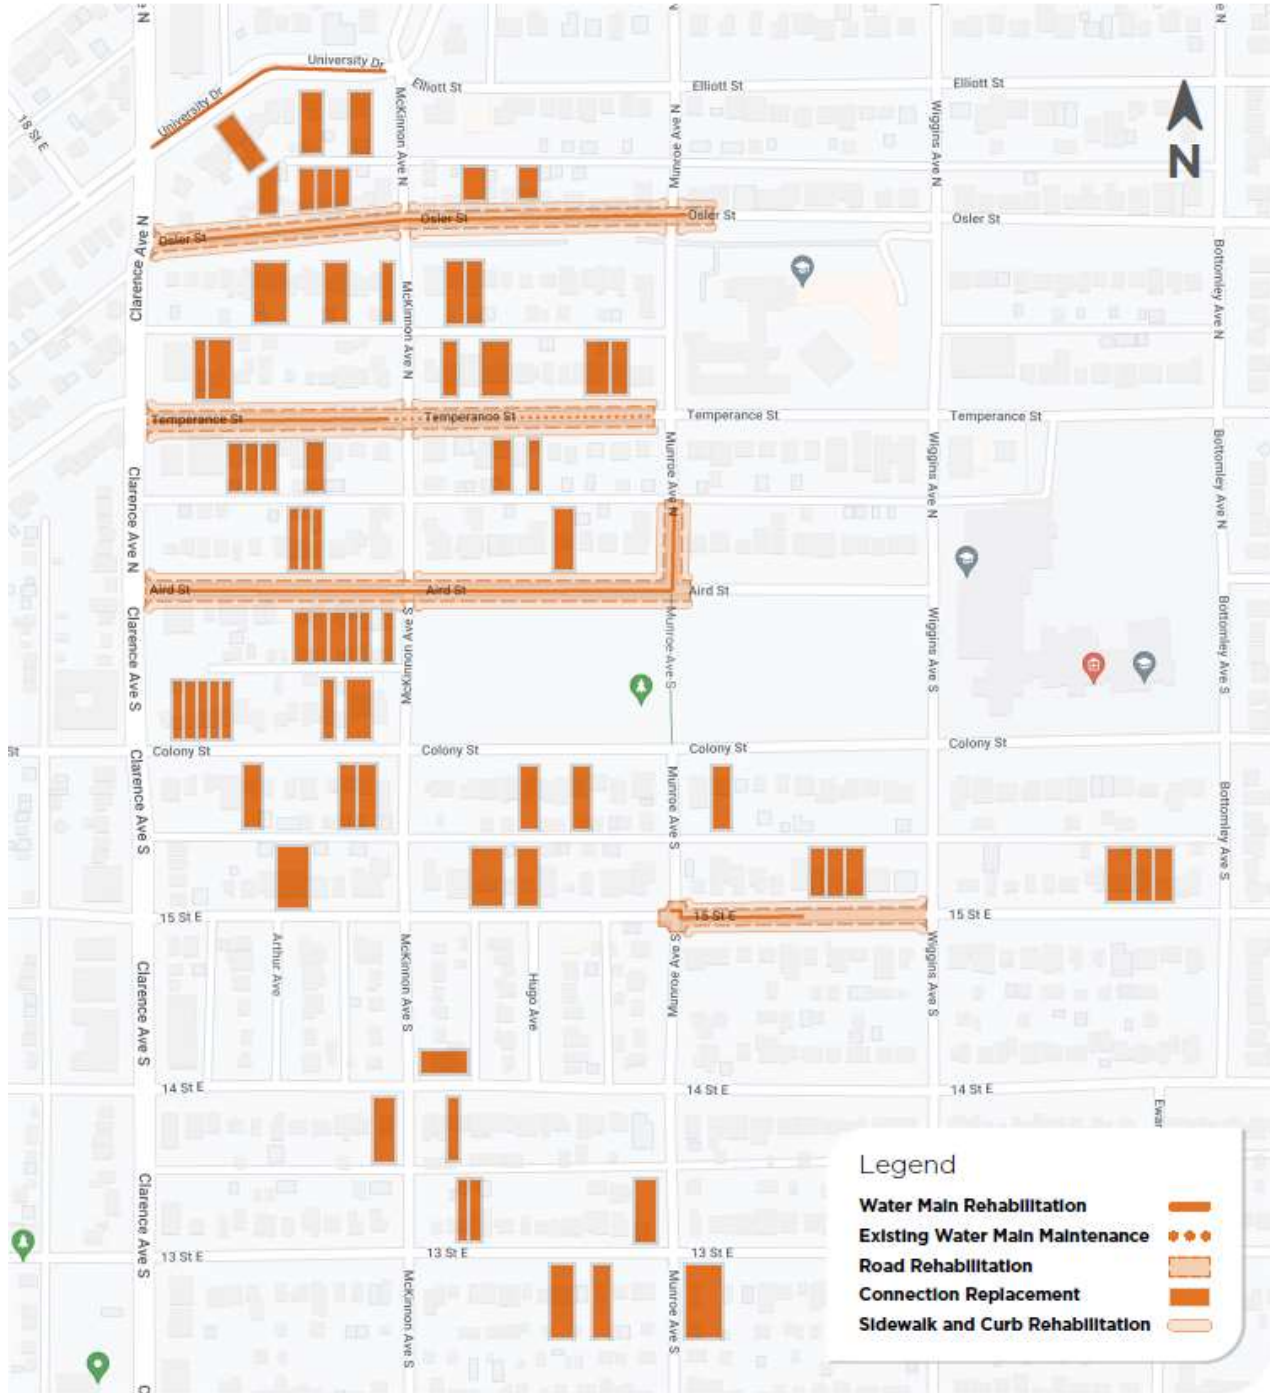

What you can expect

- As part of this project, we will replace old lead water and/or fibre sewer service connections (pipes that run from the water and sewer mains to your property) wherever necessary. If connections to your property need to be replaced, you will receive an information package in the mail that outlines the process. **If you do not receive an information package, it means your connections do not need to be replaced.**
- We'll e-mail you a short video that explains the project in more detail and how water main replacement and connection replacement projects work. Please subscribe to our construction updates to receive the video and other construction updates until the project wraps up (see how to subscribe at the bottom of this page).
- We are still in the planning stages, so construction dates have not been finalized. When they are, you will receive another Construction Notice with the schedule and other project details.
- Unfortunately, disruptions and general inconveniences are inevitable during construction:
 - The equipment working outside is loud and may cause some vibration and dust. Work will start each day at 7:00 a.m. until later in the evenings from Monday through Saturday.
 - Wherever work is happening, roads and sidewalks will be closed. You may have to park several blocks away, and even if work isn't happening on your block, you may notice more people walking, driving, and parking on your street because of the nearby closures.
 - We will do our best to accommodate you if you have mobility concerns, are moving, or perhaps have a large project scheduled. Please contact us as soon as possible and before construction begins.
 - We do our best to stick to the schedules we set, but sometimes things change! Much like renovating a home that is 100 years old, sometimes we run into the unexpected once we start digging. The best way to stay informed about any changes is to subscribe to construction updates.

How you can help

- **Stay informed!** During construction, we e-mail updates every couple of weeks. To receive updates, send a request to constructionupdates@saskatoon.ca or call us at 306-975-2476.
- If you receive an information package for the replacement of your lead water and/or fibre sewer service connection, please review and then return it to us as soon as possible.
- During the water main work, safe continuous drinking water will be provided using a **temporary water system**. For properties adjacent to the upcoming construction, you will need a functioning outdoor faucet without backflow prevention to be connected to this system. If you do not have this type of faucet, please contact a licensed plumber prior to construction beginning.
